## 457 Deferred Compensation

One of the advantages to being a participating dentist with Delta Dental is your ability to participate in the [Delta Dental 457 Deferred Compensation Plan](#) and set aside considerable pre-tax dollars for retirement. All self-employed (sole proprietor or sole practitioner) providers with one (1) hour of service are eligible to enroll.

You can choose the amount to contribute from your contract payments into your account. You don't pay federal (and in most cases, state and local) income taxes on the money you contribute on a pretax basis. The money will be taxable when you withdraw it, when you may be in a lower tax bracket. The investment earnings on your contributions are not taxed until you take them out of your account. This helps your money grow faster.

You can select from among your plan's investment options, which have been specifically chosen to give you flexibility and help you save for retirement. You can find out more by visiting the Wells Fargo website at:
